Collection Description

Historical Note
The collection consists of 246 wax seal impressions dating from the fourteenth to eighteenth centuries. Originally from Switzerland (e.g., Bern, Basel, Zurich, Appenzel) and Germany (e.g., Prussia, Baden), these seals were used to authenticate documents, charters, and other correspondence during this time period. To create the impression, a matrix is cast (usually made of metal, ivory, or stone) with the negative image on the end. Impressions were originally

*Emory Libraries provides copies of its finding aids for use only in research and private study. Copies supplied may not be copied for others or otherwise distributed without prior consent of the holding repository.*
made with the matrix on a medium of pure beeswax, however, during the eleventh century experimentation with pigments began and the compositions of the mediums were altered in order to create a harder wax and a sharper image. The medium for the impression became an amalgamation of substances (usually a mixture of beeswax with resin, clay, or soft metals), which differed per country. While clearer images were created, the seals themselves became more brittle, ultimately causing cracks to form. The sizes and shapes of the seals also varied, with royal and noble seals steadily increasing in diameter.

Scope and Content Note
The seal impressions in this collection range from 1 to 8 centimeters and come in three shapes: round, square, and oblong. They are organized based off the individual or family that they represent, with multiple stamps for the same person grouped together. For the unmarked seals, whose origin is uncertain, they are arranged by shape, and then further arranged by diameter (beginning with 1 centimeter and increasing per half centimeter up until 6 centimeters in diameter, with an 8 centimeter seal as the largest.). Most prominently represented in the collection are seal impressions from Johann Pulliant of Eptingen, Hans Jakob Holzhalb, Johannes Staehelin, Savirin, Falkner, Burckhard, and Meissner.

Arrangement Note
Arranged by name associated with the seal or by size of the seal.
