Collection Description**Administrative History**

The Office of Information Technology is responsible for all services and support related to the use of information technology in teaching, research, and administration at Emory University. From its organization in 1989 to its renaming in 2005, the office was called the Information Technology Division (ITD). Its formation in 1989 followed the establishment of a new position at Emory, the Vice Provost for Information Technology, and combined the functions of the Telecommunications Office and the Emory University Computing Center. It was reorganized in 2005 as the Office of Information Technology, headed by a Vice President for Information Technology and Chief Information Officer. Emory University Technology Services is a sub-unit of the Office of Information Technology maintaining software services and managing computing centers and labs for faculty, staff, and students.

Scope and Content Note

Records of Office of Information technology include administrative material documenting the function of the Information Technology Division through reports, manuals, promotional material, and newsletters. Records additionally include material from University Technology Services such as architectural plans and network schemas from the construction of Cox Hall, clippings and material about LearnLink, an early academic social network on the Emory campus, and documents from other digital projects at Emory. Audiovisual material consists of video recordings from divisional planning sessions and UTS events as well as slides used by ITD staff for presentations. Collection also contains the captured and preserved website of the Office of Information Technology available to browse via the Web Archiving Service of the California Digital Library.

Arrangement Note

Organized into 5 series: (1) Administrative records, (2) University Technology Services records, (3) Audiovisual material, (4) Web archives, and (5) Unprocessed additions.
